FIRST ANNOUNCEMENT

Synopsis

Mastering Medicinal Chemistry XI is the latest in an ongoing series of conferences intended to provide expert advice and guidance to current and new practitioners in the field of drug discovery. Chemists interested in learning the latest strategies and methods to make the next generation of therapeutics, from the very early stages of discovery to the latest phases of drug development, are particularly welcome to this meeting. This event will feature presentations from experienced 'drug-hunters' in both industry and academia, who will talk about the challenges faced in modern drug discovery, and will share best practice common to all successful medicinal chemists
