

BMCS Hot Topics: Covalent Drug Discovery

Thursday 16 May 2024 (*afternoon*)

Online meeting

BMCS Hot Topics: Covalent Drug Discovery

Synopsis:

Covalent binding has emerged as a key strategy in contemporary drug discovery. This online, half-day meeting will bring together experts from both academia and industry to discuss recent advances in using covalent small molecules to target challenging protein targets.

The BMCS Hot Topics online meetings are intended to highlight breaking areas of research in fields of science relevant to drug discovery. They will run as stand-alone half-day virtual events, 2-3 times per year. The programme will be targeted towards researchers working who would like to enhance their understanding of these nascent or developing fields.

Speakers:

Brian Lanman, Amgen

Inhibiting KRAS: Strategies, Structures, and Lessons Learned in the Invention of Sotorasib

Simon Lucas, AstraZeneca

Development of AZ's Covalent Hit-Identification Platform

Dan Nomura, University of California

Reimagining Druggability using Chemoproteomic Platforms

Lyn Jones, Dana-Farber Cancer Institute

Covalent Drug Discovery – Beyond Cysteine Targeting

Organising Committee:

Adrian Hall, UCB

Daniel O Donovan, AstraZeneca

Harriet Riley, RSC

Chris Swain, Cambridge MedChem Consulting
