First announcement and call for abstracts

9th RSC/SCI Symposium on GPCRs in Medicinal Chemistry

Wednesday-Friday, 2-4 October 2024

Evotec Campus Levi-Montalcini, Verona, Italy

#GPCRs2024
Synopsis

The key role of G protein-coupled receptors (GPCRs) in human disease underpins their importance to modern medicine. We are pleased to be holding this 9th meeting in the series on GPCR drug discovery, which will combine cutting edge medicinal chemistry with innovative structural biology and novel drug design approaches.

The meeting will consist of:

- Case studies in GPCR drug discovery and development
- Structural biology advances and impact on drug design
- Showcasing multiple modalities and drug discovery approaches to modulating GPCRs

Also: Poster session – Trade exhibition opportunities – Two evening dinners and vineyard visit – Accommodation agency booking service.

Organising Committee

Daniele Andreotti *Evotec*
Adrian Hall (Co-chair), *UCB*
Daniel Jones *Sosei Heptares*
Caroline Low (Co-chair), *Isomorphic Labs*
Lampros Milanos *Charles River Laboratories*

Call for Abstracts

Abstracts are invited for both oral and poster presentations. Poster applicants have the opportunity to provide a short flash oral presentation. Closing dates are Friday 28th June 2024 (oral) and Friday 6th August 2024 (poster). Several prizes will be awarded.

Registration, Students, Bursaries, and Exhibitor Opportunities

Registration is opening soon, and discounted rates are offered to RSC and SCI student members. Some bursaries are also available. Information about exhibitor opportunities may be found on our webpage.
