

**Marius Stan, *Mayo Clinic***

Marius N. Stan, M.D., is a consultant in endocrinology at Mayo Clinic in Rochester, MN since 2007. He is a Professor of Medicine and past Chair of the Thyroid Core Group at Mayo Clinic. He combines clinical work with clinical research. He is primarily working in autoimmune thyroid diseases, with a specific interest in Graves' disease and Thyroid Eye Disease (TED). He is the medical director of the TED Clinic and Thyroid Biopsy-Ablation Clinic at Mayo Clinic Rochester and has been the PI or Co-PI for several clinical trials targeting these disorders. He is a member of the American Thyroid Association/European Thyroid Association taskforce dedicated to the management of TED and a member of the ATA Taskforce focusing on the evaluation and management of thyrotoxicosis. A separate area of research relates to management of thyroid nodules through radiofrequency ablation (RFA) and ethanol ablation. This involves benign nodules, toxic and non-toxic, as well as thyroid carcinoma. Under his direction the Mayo Clinic group has been a pioneer in this area of therapy and continues research on the most efficient use of these ablative techniques.
