**Kyubo Shin,** *THYROSCOPE INC*

Kyubo Shin is the Research Director at THYROSCOPE INC, a digital health company developing AI-driven solutions for thyroid-related disorders, including Thyroid Eye Disease (TED) and thyroid dysfunction. He has led the development of Glandy CAS, EXO, and LID— AI tools that analyse frontal facial photographs to assess disease activity and severity in TED. He also oversees the development of predictive technologies that use wearable-derived heart rate data to detect thyroid dysfunction. His work focuses on creating clinically applicable tools that support early detection, objective monitoring, and personalized care in thyroid-related diseases.
