

Dr Kunwar Bhatia, *Imperial College Healthcare NHS Trust*

Dr Kunwar Bhatia is a consultant radiologist and the current subspecialty lead in head and neck imaging at Imperial College Healthcare NHS Trust. Dr Bhatia is skilled and passionate in all aspects of head and neck imaging including oncology, thyroid, skull base pathology, otological, sinonasal, orbital, salivary, maxillofacial disease. He is an active collaborator in thyroid eye disease imaging research at Imperial and has worked on imaging optimisation for detection, monitoring and prediction. Dr Bhatia previously worked in Hong Kong for a decade as an Assistant and then Associate Professor at The Chinese University of Hong Kong, where he conducted grant awarded research on advanced imaging in nasopharyngeal cancer, squamous cell cancer, salivary, thyroid and lymph node diseases. He also performed research on advanced head and neck ultrasound including elastography, for which he completed his MD thesis. He has authored over 50 original articles, numerous review articles and book chapters and is an active journal reviewer, speciality editor and an international speaker. In recent years Dr Bhatia has been working as the Head and Neck Editor for iRefer under the Royal College of Radiologists, England, to optimise and develop evidence-based guidelines for referrers to request the most appropriate imaging for different head and neck indications. These guidelines are integrated into clinical decision support systems in the United Kingdom as well as internationally. In his spare time, Dr Bhatia likes to garden, DIY, photograph and explore nature.
