

Karim Meeran, *Imperial College London*

Professor Karim Meeran did his undergraduate and postgraduate training in London, and then proceeded to an academic career at Imperial College. He is a Fellow both of the Royal College of Physicians and the Royal College of Pathologists. He is the Training Programme Director for Metabolic Medicine and Endocrinology in London and sits on the Education Committee for the European Society of Endocrinology. He has over 100 peer reviewed articles and has published on Cushing's syndrome, pituitary diseases, and the replacement of patients with pituitary and adrenal failure with glucocorticoids. He is part of a TED MDT and undertakes regular clinics for patients with Graves Ophthalmopathy. He is running an international study to compare low dose (3mg) prednisolone once daily with hydrocortisone three times daily in the search for a replacement that will avoid the need for emergency treatment of hypoadrenalism. Participants are welcome to join and details are on <http://www.imperialendo.com/prednisolone-research>
