

EED Satellite Meeting (Monday 8th & Tuesday 9th June 2026): Arthropod

Organisers:

- Ezzat El-Sherif
- Christine Mau
- Frederic Strobl

The Arthropod Meeting will cover a wide range of themes on the development and evolution of arthropods, featuring short talks (15–20 minutes) and a lively poster session. The satellite aims to bring together researchers from different disciplines to share insights on morphology, genomics, ecology, and phylogeny. By encouraging exchange across diverse model systems and approaches, the meeting fosters collaboration and fresh perspectives on arthropod biology. It also offers a welcoming platform for early-career scientists to present their work, connect with peers, and engage with leaders in the field.

Invited Speakers:

The Invited Speakers for this meeting will be announced shortly. Please check back soon.
