

Physics in Food Manufacturing Conference 2020

15–17 January 2020

Weetwood Hall Estate, Leeds, UK

foodphysics2020.iopconfs.org

The conference is organised jointly with the IOP Liquids and Complex Fluids group under the following six themes: complex fluids and rheology (including surface rheology, extensional flows in food and oral processing); measurement science challenges and physical measurements in foods; process engineering and manufacture (including powder handling, conveying, in-line rheology, rheological changes, thickening and gelatinisation); flows in sensory physics (e.g. crispy-crunchiness, vibro-tactility and creaminess); colloid science in foods (including physics in digestion and particles at interfaces); and physics in digestion (including flow physics of food macromolecules).

Sponsorship

The conference offers an array of sponsorship opportunities for those companies who want to increase their visibility within the community. Due to limited facilities at the venue for an exhibition, our sponsorship packages offer you a solution to maximise communication with delegates.

Why sponsor

- Sponsorship contributes significantly to the promotion, planning and operation of the conference, reducing the overall cost of managing the event and enabling a higher level of participation
- Demonstrate your commitment to assisting the development of young researchers
- An opportunity to promote your organisation and raise your profile within the wider international community
- Promote your company name to participants prior to, during and after the conference – these include decision makers, scientists and students
- Your support of the conference will be acknowledged widely through web-based and printed material

Gold packages

£1000 + VAT*

Our gold packages are exclusive and will be allocated on a first come, first served basis.

All gold sponsors will benefit from the following:
