

# CMD29

**22–28 August 2021**

Manchester Central Convention Complex, Manchester, UK

<http://cmd29.iopconfs.org>

CMD29 is a large international conference covering all aspects of condensed matter physics. It is the 29th in the series of general conferences of the Condensed Matter Division of the European Physical Society, organised together with the Institute of Physics.

After 38 years, CMD returns to Manchester, site of CMD-2. That second conference was bolstered by the enthusiasm generated by CMD-1, the very first large European condensed matter physics meeting held in Antwerp (Belgium) in 1980.

Manchester and the United Kingdom were expressly chosen by the CMD Board of the EPS and the IOP in order to affirm our common commitment to pan-European collaboration in scientific research and in condensed matter physics in particular. The city of Manchester and its universities are centrally located within the UK, easily accessible from all of Europe and beyond, is a major centre for condensed matter research, and, by its many restaurants, bars, hotels, and other services and infrastructure offers splendid opportunities for a most productive meeting and a vibrant social programme.

## Call for mini-colloquia

In keeping with the usual CMD conference format, the programme CMD29 will be built around a collection of “bottom-up” mini-colloquia (i.e. topical sessions) on subjects of actual interest. Mini-colloquia are conceived in a form that the majority of delegates, including young physicists, have an opportunity to orally present their work. Mini-colloquia will have the same format and modus operandi as at the previous EPS-CMD conferences. Mini-colloquia resemble Focus Sessions at similar meetings, and host invited lectures, oral contributions and posters.

**You can submit your minicolloquia proposal at <http://cmd29.iopconfs.org/minicolloquia>.**

## Key dates

<u>Submission deadline for mini-colloquium proposals</u>	<u>13 November 2020</u>
<u>Early registration deadline</u>	<u>4 June 2021</u>
<u>Registration deadline</u>	<u>9 August 2021</u>
