

Areas of Influences: 7 Overlooked Aspects of Writing an EPSRC Proposal

E Massung

EPSRC, UK

Writing a proposal for the Engineering and Physical Science Research Council can be a daunting prospect: a lot of time and energy is spent developing a project where the funding outcome is far from certain and much of it feels outside of the Principal Investigator's control. As a former EPSRC portfolio manager, I'm afraid there is nothing I can say to guarantee a successfully funded grant proposal ... but I can highlight seven aspects of writing a proposal that are often overlooked but which can impact how the grant is processed.
