The IOP Physics and the Green Economy Summit, a hybrid event, 22–25 November 2021, will discuss scientific and technological advances in energy generation and decarbonisation, and the practical challenges that need to be overcome.

The online conference offers an array of sponsorship opportunities for those organisations who are developing solutions to reduce our impact on the environment and achieving net zero in the future. Companies who want to increase their visibility within the community are invited to sponsor this conference and showcase their commitment to a greener economy.
