

PR'13

International conference on photorefractive effects, materials and devices

4–6 September 2013, The Winchester Hotel, Winchester, UK

Organised by the IOP Optical and Quantum Electronics and Photonics Groups

Sponsorship

PR'13 is an international conference that will for the first time be held in the UK. This conference aims to attract more than 100 scientists and will offer opportunities for presentations on enhancement and applications of photorefractive nonlinearities, as well as on suppressing or controlling such effects in high-power optical devices. We invite sponsorship from companies and organisations wishing to raise their profile within this scientific community.

Why sponsor?

- an opportunity to promote your organisation and raise your profile within the wider community;
- promote your company name to national and international participants, prior to, during and after the conference – these include decision makers, scientists and students;
- demonstrate your commitment to assisting the development of young researchers;
- your support of the conference will be acknowledged widely through web-based and printed materials;
- sponsorship contributes significantly to the promotion, planning and operation of the conference, reducing the overall cost of managing the event and enabling a higher level of participation.

Sponsorship opportunities

The following sponsorship packages are available.

Premium sponsor

£1250

Included within the premium package:

- sponsors can display a banner in the main reception area or conference room;
- acknowledgement as a sponsor on all materials relating to the conference;
