Physics of Emergent Behaviour

From single cells to groups of individuals

24–26 June 2013
The Grand, Brighton, UK

Organised by the IOP Biological Physics Group

Exhibition and Sponsorship

This conference will provide an opportunity to discuss current research on the various aspects of emergent behaviour in living organisms, covering a multi-scale spectrum from intracellular domain, to multicellular collectives, and up to large groups of organisms.

Exhibition

A table top exhibition will be held alongside the conference to provide companies in the field the opportunity to display their products to a specialised audience.

Why exhibit?

- demonstrate the range and quality of your products and services to a specialised audience;
- maximise your exposure both nationally and internationally and connect with industry representatives;
- establish your company within the scientific community;
- target new customers and build existing relationships;
- showcase new or upgraded product ranges.

Exhibition package

£500 +VAT

Space is available as a table top display and includes:

- one 6ft table and chair;
- company logo and link on the conference website;
- company logo and profile in the delegate handbook;
- lunch and refreshments for one exhibitor representative for the duration of the conference.

Exhibition packages are limited and allocated on a strictly first-come, first-served basis. To reserve your space, please complete and return the stand reservation form overleaf.

Sponsorship

We also invite sponsorship from companies and organisations wishing to raise their profile within the community and increase their visibility at the conference.

Why sponsor?

- an opportunity to promote your organisation and raise your profile within the wider community;
- promote your company name to national and international participants prior to, during and after the conference – these include decision makers, scientists and students;
- demonstrate your commitment to assisting the development of young researchers;
- your representatives can mix informally with professionals from industry and academia in the UK and all around the world;
- your support of the conference will be acknowledged widely through web-based and printed material;
- sponsorship contributes significantly to the promotion, planning and operation of the conference, reducing the overall cost of managing the event and enabling a higher level of participation.
